

CAPABILITY STATEMENT

SBA 8(a), SDB | CMMI DEV & SVC ML3 | ISO 9001:2015 | ISO 20000-1:2018 | ISO 27001:2022

COMPANY PROFILE

Established in 2013, Bravent LLC stands at the forefront of innovative web solutions, offering a comprehensive suite of services that span modern web development, web/api security, federal government security compliance, robust infrastructure setup and maintenance, cutting-edge DevSecOps practices, and sophisticated identity access management and cybersecurity. Our solutions cater to a broad spectrum of needs within several Federal Agencies, including but not limited to the General Services Administration (GSA), Department of Commerce, Defense Contract Management Agency (DCMA), National Institutes of Health (NIH), and the United States Agency for International Development (USAID). With a rich history rooted in open-source innovation, our founders have been instrumental in orchestrating some of the most significant web projects for the federal government, including usaspending.gov, data.gov, itdashboard.gov, acquisition.gov to name a few.

- Modern Web Full Stack Development
- Cloud Infrastructure Setup and Maintenance
- DevSecOps
- Identity Access Management and Cybersecurity
- Advanced Document Management
- Federal Government Web/API Security Compliance
- Drupal Development
- Unified Communications & Collaboration (UCC) Services

GSA	Office of Government wide policy's web Portfolio
NTIA	National Telecommunications and Information Administration's Websites and Infrastructure
NIH	National Institute of Health's Identity, Credential and Access Management and CIT Cybersecurity Support with Deloitte
DOI	BUREAU OF LAND MANAGEMENT (BLM), OREGON/WASHINGTON STATE OFFICE APPLICATION DEVELOPMENT

Modern Web Development: Expertise in full-stack JavaScript-based, Drupal, Java, .Net based solutions tailored for federal agencies. Instrumental in introducing drupal in federal space and building many critical applications like recovery.gov, usaspending.gov, gsa.gov, usa.gov, commerce.gov etc.

Web/API Security: Implementation of robust web and API security protocols aligned with federal government standards.

Federal Government Security Compliance: Proficient in adhering to stringent federal security frameworks and compliance requirements

Advanced Dashboards: Development of sophisticated, real-time dashboards for data-driven decision-making. Built modern federal dashboard systems like diftaldashboard, itdashboard and data.gov.

Cloud Infrastructure: Design, setup, and maintenance of scalable, secure cloud environments in Azure and AWS.

DevSecOps: Cutting-edge CI/CD pipelines integrated with security-first DevSecOps practices to ensure continuous delivery.

Identity Access Management & Cybersecurity: We deliver comprehensive identity and access management (IAM) solutions for NIH, including the issuance of PIV, Restricted Local Access, and Alternate Logon Token cards to secure NIH systems, NIH Active Directory management for single sign-on, location-independent access, and security, along with self-service portals for password changes and account unlocks. Additionally, we provide centralized authentication and authorization services, to securely access applications using PIV credentials and external federation services. To enhance security, we facilitate encrypted network communications, device authentication, and secure connections to NIH resources.

Unified Communications & Collaboration (UCC) Services : Delivering comprehensive UCC infrastructure solutions, including voice, video, messaging, and collaboration services, to support NIH's virtual workplace and enhance scientific and administrative collaboration.

Advanced Document Management & Migration Solutions - Expertise in converting legacy PDF/Word documents into modern, workflow-driven, browsable formats, with API integration and DITA format conversions.
